

The free fiber optic router is unstable

Overview

Power cycling your modem (or ONT) and router can resolve temporary glitches, clear memory, and reset network connections. Wait for at least 30-60 seconds. This allows the devices to fully discharge and reset. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. I'd run some continuous ping tests to start narrowing things down: Your Router ISP Gateway/Router Major website or DNS (anything that will leave the ISP network. In. Experiencing an outage or no internet connection?

For all broadband connectivity issues, please contact your broadband provider directly; this is the quickest way to identify and resolve service issues.
