

There is an unusual noise from the lighting distribution box

Overview

While a faint hum is often normal, louder buzzing, sizzling, or sparking noises may indicate serious issues that require immediate attention. This guide will cover everything you need to know about the noises your electrical panel might be making. That low, persistent hum or irregular crackle isn't just background noise. Your panel could be trying to tell you something. Usually, electrical panels operate. Your home's electrical panel, also known as a breaker box, is the central hub that distributes electricity to power your lights, appliances, and devices. When this central hub begins producing unusual sounds, it naturally causes concern for homeowners. These panels manage high-voltage electricity. Some common reasons for electrical humming or buzzing noises include: If electrical wires are not properly secured or damaged, they can vibrate and emit a humming noise.
