

Three-phase busbar connector

Overview

A 3-phase busbar system consists of three (or four) parallel conductors carrying the three phases (L1, L2, L3) of a three-phase AC system, plus a neutral conductor (N) in 4-wire systems. The conductors are typically flat copper or aluminum bars, insulated from each other and from. Acti9 is easy to choose, thanks to its meaningful part numbers. Example: A9xxx225 = 2P, 25 A This Acti 9 horizontal comb busbar 18mm modules for Acti 9 iC60 or Acti 9 iK60 is cuttable. It is dedicated to 3L installations. It is suitable for 8. Amphenol offers high-performing, low-resistance Busbar connectors with designs to conveniently distribute power between busbars, cables, and circuit boards. The system saves considerable line side wiring and space for multi-motor panels. It is also ideal for panels where several feeder breakers are used and will save significant.
