

What are the models of main power distribution boxes for construction sites

Article Overview

Construction site power distribution boxes come in various models, including pre-wired assemblies, modular mains distribution assemblies, and ENERGYBOX units, with ratings from 16 A to 4000 A and multiple outlet configurations.

Common Models and Types

1. Pre-Wired Construction Site Boards (ENERGYBOX ACS) These are ready-to-use distribution boards made from durable technopolymer with fire-resistant backrests. They can be wall-mounted or installed on supports and are suitable for civil building sites, outdoor events, and temporary installations. They typically handle currents from 32 A to 63 A and are designed for repeated use across different sites . 2. Mains Distribution Assemblies (MDAs) Manufactured by companies like Blakley Electrics, these assemblies cover a wide range of ratings from 100 A to 4000 A. They include incoming and outgoing switchgear, MCCBs with adjustable electronic trips, and can be configured to customer requirements. Form 4b Type 7 MDAs offer fully segregated units, allowing safe access to individual breakers for maintenance . 3. Standard Power Distribution Boxes These boxes are robust, often made of sheet steel or high-quality plastic, and designed for 16 A to 63 A circuits. They feature multiple 230 V and 400 V outlets, individual circuit breakers, and RCD protection to isolate faults without shutting down the entire system. They are available in mobile or fixed installation variants . 4. Modular and Customizable Units Some manufacturers, like BOSECKER, offer modular series such as BLOCK and DOMINO, made from thermoplastic or fiberglass. These units are versatile, pre-wired, and can be customi...
