

What is an SFE distribution box

Article Overview

An SFE distribution box is a portable, industrial-grade electrical enclosure designed to safely distribute power to multiple circuits, often featuring waterproof and dustproof protection for outdoor or harsh environments.

Overview

An SFE distribution box is a type of electrical distribution box manufactured by Wenzhou Shangfeng Electric Co., Ltd. It is designed to receive electrical power from a main supply and distribute it safely to multiple branch circuits while providing protection against environmental hazards such as water, dust, and extreme temperatures . These boxes are commonly used in industrial, commercial, and outdoor applications, including construction sites, temporary power setups, and machinery installations.

Key Features

- **Waterproof and Dustproof:** SFE boxes use advanced sealing technology to achieve high IP ratings (IP54 to IP66), ensuring reliable operation in wet or dusty conditions .
- **Durable Materials:** Constructed from ABS, PC, and solid brass, these boxes are resistant to impact, corrosion, and temperature extremes ranging from -20°C to 80°C .
- **Flexible Installation:** Equipped with screw holes for wall mounting, making them suitable for both stationary and portable setups .
- **Industrial-Grade Performance:** Designed to withstand harsh environments, providing stable and long-lasting electrical distribution
