

What kind of cable is Huijue fiber optic patch cord

Overview

It is composed of fiber optic cable and fiber connector that fixed at both ends of optical cable, has been widely used in various fields such as fiber optic communication systems, fiber optic access networks, fiber optic data transmission, CATV, and local area. It is composed of fiber optic cable and fiber connector that fixed at both ends of optical cable, has been widely used in various fields such as fiber optic communication systems, fiber optic access networks, fiber optic data transmission, CATV, and local area. Fiber Optic Equipment - Shanghai Huijue Network Communication Equipment Co. Capacity: 576 Cores China Fiber Optic Equipment catalog. Fiber optic patch cord refers to the connecting cables used to connect fiber optic equipment in fiber optic communication systems. It offers high bandwidth, low signal loss, and resistance to electromagnetic interference (EMI), making it ideal for modern high-speed networks. Unlike backbone trunk cables—which are typically multi-fiber.
