

Which router should I choose for mobile fiber optic internet

Article Overview

For mobile fiber optic internet, routers that support multi-gig speeds, Wi-Fi 6 or 7, and strong coverage like the NETGEAR Nighthawk RS700S or ASUS RT-AX86U Pro are ideal.

Key Considerations

When choosing a router for fiber optic internet, consider the following:

- **Speed Compatibility:** Ensure the router supports multi-gigabit speeds to match your fiber plan. Routers with 2.5G or 10G WAN/LAN ports are recommended for high-speed connections .
- **Wi-Fi Standard:** Wi-Fi 6 (802.11ax) or Wi-Fi 7 is preferred to maximize wireless performance and reduce latency, especially for gaming, streaming, or multiple devices .
- **Coverage:** Choose a router with strong range to cover your home or office. Mesh systems can help eliminate dead zones in larger spaces .
- **Device Handling:** Look for routers that can manage many simultaneous connections without performance drops, particularly if you have smart home devices or multiple users .
- **Security Features:** Built-in security like AiProtection or NETGEAR Armor helps protect against malware and unauthorized access .
